

XMM-Newton CCF Release Note

XMM-CCF-REL-339

EPIC PN Offset Table

M.J.S. Smith

October 10, 2016

1 CCF Components

Name of CCF	VALDATE	EVALDATE	Blocks Changed	XSCS Flag
EPN_ADUCONV_0142.CCF	2016-08-25T12:52:16		OFFSET_GAIN	NO

2 Changes

A new PN Bad Pixel Table is systematically in use from revolution 3061 onwards, and the BPT_CODE header keyword value has been updated accordingly.

The BPT_CODE keyword identifies the current version of both the uploaded bad pixels *and* the column offsets and allows cross-checking between HK telemetry and CCF issue. Although the uploaded offsets remain unchanged, for consistency the EPN_ADUCONV CCFs do require an update because of the new the BPT_CODE keyword value in the OFFSET_GAIN extension.

3 Scientific Impact and Estimated Scientific Quality

There are no scientifically relevant changes with respect to the previous CCFs. The changes in the new CCF have no scientific impact.

4 Test Procedures and Results

Validity date verified with *cifbuild*; correct functionality tested with *epproc* (SAS 15.0.0).
